

# Family trips

in Olomouc region

[www.ok-tourism.cz](http://www.ok-tourism.cz)

## Dear trippers,

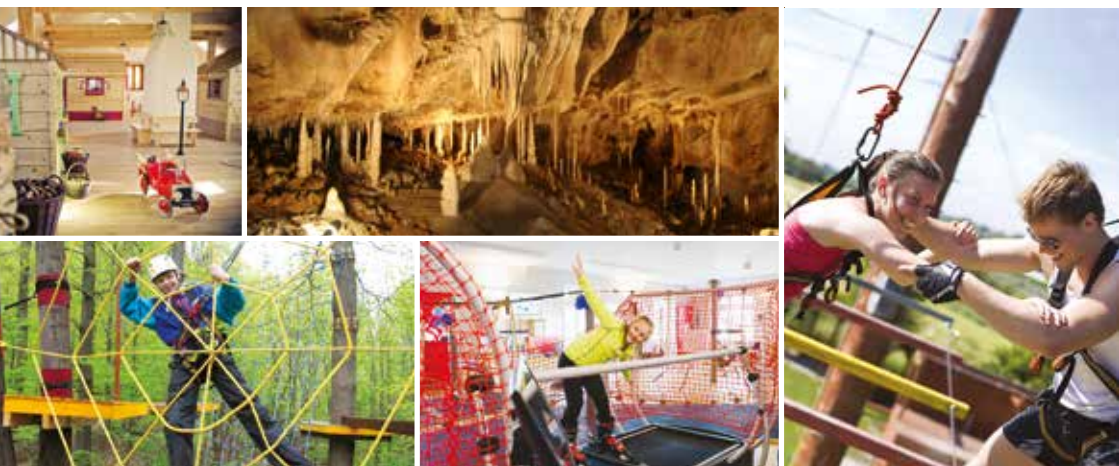

you may be wondering, whether this guide book focused on families is needed, as we have already published a general guide book intended for all travellers. I think that this is completely clear for those of you who have children. Nevertheless, if you are expecting a baby or have already forgotten about the trips with your children, I will try to remind you.

Before the family sets off on a trip, it must be evident, whether the place is accessible with a pram, if the chosen attraction is suitable for children and if there are any family discounts. What is more, parents need to choose such a destination that will be interesting both for the children and the parents, since a grandmother or a grandfather may join them.

You can believe me that it takes a lot of time to find such information. Our guide book is here to help you and to shorten the time spent searching. Thus you can set off on a trip earlier and spend more time together. The family guide book is not something extra, however, it is a basis. I believe you will appreciate that.
